

I am writing in support of K-LOVE. It is the best station I have ever listened to. We have no others like it though there are an abundance of rock, country and other stations. It is unique and supports so many of us in our daily lives. It has proven itself by surviving with funding from listeners so obviously has a wide base of support. It supplies a one of a kind listening experience for so many people and I personally would miss it extremely. As a physician I come in contact with many people and find a big group of fans out there for K-LOVE. I challenge you to listen for even an hour and hear the positive energy from the station that we all need in our daily lives.
